

Here are the bullet points describing what the purpose of the report is. I have attached them as a powerpoint slide in case you want that but would be comfortable simply saying out loud these key points.

- CareerPoint and Futureworks collaborate on the Hampden County Re-Entry Program to serve ex-offenders in job search
- The joint project necessitates a mirroring of Career Center Specific Program buttons that represent the following at each career center:
 - A global Re-Entry Program button into which all re-entry customers are enrolled and 5 sub-programs:
 - PRC – Pre-Release Center
 - Main Institution RE-Entry Unit
 - DRC – Day Reporting Center
 - AISS – After Incarceration Services
 - Shannon Grant
- After 3 years of the program, we discovered that about 10% of all enrollees were now active in 2 or more of the sub-programs, because an effort was never made to exit from one sub-program prior to enrolling in another sub-program
- This led to duplicate counts of individuals and services in the monthly activity reports generated for each sub-program
- The report is designed to identify only those Re-Entry customers who are simultaneously actively enrolled in 2 or more of the 5 sub-programs
- The report shows the enrollment and/or exit date from the Re-Entry global program and each of the 5 sub-programs
- The report highlights in **bold** the most recent date of enrollment to easily see which sub-program the customer currently should be kept active in, allowing us to exit from previously enrolled programs.
